Helping you teach GCSE computer science

The Computer Science Accelerator Programme is a flexible professional development programme that gives you the tools and confidence to teach GCSE computer science.

The programme is suitable for current or aspiring teachers of computer science, so whether you're looking to top up your knowledge in a specific area, or to start the path to teach this high demand subject at GCSE, we've got you covered.

Start learning with us today

You can tailor your training to meet your needs, opting from a wide range of courses, available both online and in-person. Our learning pathways will help you to get started and offer a structured route through the programme, based on your level of experience.

Throughout your programme, you'll be supported by a team of experienced educators and have access to learning resources designed to help you achieve your goals.
